1. The general subject of LID was presented to West German officials in East Berlin and Bonn during the last week of 1961 [] during his recent visit to Frankfurt. The views which occurred was not until now, and also of the problem of balancing LID's need for a regular, steady flow of support with the requirements for various facilities. Incorporated into each LID provided for the support of the Major points discussed are highlighted further along in this report, both to make them a matter of record and to provide a basis for SOG for guidance in future LID and King and Associates. It is noted at the outset, however, to provide a brief review of the current commitment of FOR proper to LID support of LID (see also (FO notes and other address facilities contained).

2. The present situation is as follows:

developing new LLDs:

(a) Forwarded staff and Principal Agent manpower commitment to LLD procurement and handling:

1. Within the SO Branch proper, [] is assigned exclusively to this function, and [] is occupied approximately 90% of his time at it. [] is occupied roughly 20% of his time with LLDs, and [] who is also responsible for CAPUL/CANOIR and surveillance/investigation development, roughly 30%. The manpower of the Branch is now fully extended on its support, and stay-behind tasks.

2. Outside the SO Branch, we have drafted the following manpower:

a) [] of the Soviet Branch has been detailed full-time on an indefinite basis to SOG/EO for use in handling LLDs and assisting in the development of new ones.

b) Three officers of the German Branch have been given lists of LLD candidates for initial location, approach and assessment under non-intelligence cover. This assignment is in addition to their normal responsibilities.

c) CAVERDICT will be occupied approximately 50% on initial approaches to and spotting of LLD candidates, in addition to his continuing use on ZIBET developmental operations.

d) As our roster of LLDs grows, individual officers in other Branches will be assigned the handling of recruited LLDs in addition to their primary operations tasks.

NOTE: A related problem is the procurement of additional PO boxes to which LLDs mail letters received from BOB agents. As an SOP, we restrict each PO box to not more than 3 LLDs. With increasing scarcity in available PO boxes, procurement of boxes has become something of a minor operation in itself.

(b) Accelerated our program for approaches to and assessment and recruitment of recorded LLD leads:

1. Our inability to supply BOB any new LLDs immediately was the result of the need to drop CABATON 46 on the grounds of his confession of his connections with UTHILL. Since CABATON 46 had been involved in the recruitment of two new LLDs (our normal reserve), including CABATON 58, we had no choice but to terminate further interest in these, also.

2. One new, recruited LLD, CABATON 65 (who does not receive mail directly, but through an unwitting drop), will be made available to BOB as soon as he has been tested. We had also intended to assign to BOB the newly-recruited CABATON 66, but were obliged to assign this LLD to CACOFFEE 1 in response to DIR 35789.

3. Four additional candidates, not yet designated, will be subjected to recruitment approach as soon as the IOAs requested on them in early January 1962 have been received. Note: These do not include the candidates to

whom BOB has taken exception in Reference B and who will accordingly be dropped from further consideration.

4. An additional nine FOA requests have been recently submitted on candidates who have been the subjects of initial, non-intelligence approaches (on the basis of their replies to a newspaper advertisement for ODIBEX employment possibilities).

(c) Initiated exploitation of potential LID-lead mechanisms:

1. Even if all the known leads mentioned under Paragraphs 3 (b) 3. and 4. above were to prove acceptable and willing to accept recruitment, which is hardly likely, we will still clearly require sources producing LID leads on a more systematic basis than needed in the past. To begin with, we are serving spotting requirements on existing FOB assets who appear suitable for such use, e.g., CAUGH, CAPTULATOR and AEGOMANZA.

2. To develop with minimum delay some LIDs in the Rhine-Ruhr area, we have initiated a modest program of approaching individuals located in suitable residential districts (i.e., neither wealthy nor pauper areas) under cover of a limited ODIBEX "public opinion" survey on current developments. Einwohnerumfrage checks and FOA requests will be instituted on suitable individuals contacted through this means.

3. Pursuant to [] useful suggestion, we have also discussed with the local CALLIKAR chiefs the general situation with regard to East German mail to West Germany, as well as the possibility for certain spotting assistance CALLIKAR might render our effort to develop leads--not only for suitable LIDs, but also for West German support agents in response to EGPA-71125. (NOTE: the question of support agents was not even indirectly reflected in our discussion with the CALLIKAR representatives, who are aware of our interest in LIDs.) Some useful background information obtained on the general situation is discussed in Paragraph 4 below. With regard to spotting assistance, CALLIKAR has agreed to carry out the following pilot operation:

On the basis of an 80% listing of smaller cities (10,000 to 100,000 population), not to include those where there are major concentrations of GDR troops or significant facilities, CALLIKAR will direct each of its three field stations in Mannheim, Wiesbaden, and Regensburg, those being primarily concerned with East German mail, to screen out and microfilm approximately 200 letters addressed to individuals in these smaller cities. Letters are to be chosen also on the basis of non-business character and on the absence in them of controversial content, e.g., complaints against the East German regime, pro-Western sentiments, etc. The intercepts will be delivered to FOB in installments, as received. They will be roughly screened and the checks run as then indicated. The data will be made available to do further rough screening, to eliminate known East German espionage operations which appear appreciable quantities, etc. Initial contacts under non-operational cover should further narrow down the list of eligibles, on whom FOA requests will then be initiated, and actual recruitment approaches carried out. In the process of screening and initial processing, due attention will be given to selecting particularly suitable candidates for action, as opposed to all else. The local CALLIKAR chiefs are to produce
